

BRUSHING TECHNIQUES

After a night of drying your work is ready to be colored/finished.
Accelerate the time of drying with a hair dryer or another heat source if necessary.

Tip: Protect your work surface with plastic.

1. Take a flat brush and a bit of Easy Varnish
- 2/3. Take a little Colortricx/Powercolor and mix.
4. Wipe the excess on a piece of cloth or paper towel.
5. Gently paint on the folds, add more pigment for more intense results.
6. Give face to a more natural effect of bronze by mixing it with a little Colortricx Brons Gold and Powertex Bronze (0104). Mix well, and then wipe the brush on paper towel and brush head in plaster.
- 7/8. Create more depth by adding light with Easy varnish and Colortricx Clear Gold (0103).
